REMARKS

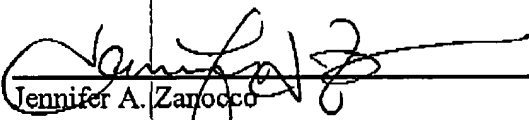

Claims 17, 28, 29 and 33 are amended. Claim 17 is amended to recite, "a functional area on the substrate, comprising one or more active organic elements". Claim 33 is amended to have a preamble reciting, "An organic electronic device having one or more components that are sensitive to moisture or oxidizing agents," and a body that recites, "an organic functional area on the substrate, comprising one or more active organic elements". Claims 28 and 29 are amended to describe the relationship between the one or more active organic elements and at least one stack. Claim 29 has also been amended to recite "the functional layer comprises at least one organic radiation detecting layer forming an organic radiation sensor".

Applicant asks that all claims be examined in view of the amendment to the claims.
